Dear parent/carer,

## Year 11 Parent Information

As you will be aware, we are unfortunately not able to host our parents' evening this term in the traditional format due to government guidance. However, it is fundamentally important to us that we communicate with you about your son/daughter's progress this term and how together we can support them.

We have prepared a series of videos for you from Mr Kelly (Head of Year 11) and every Head of Department. These videos will discuss the start to the term that Year 11 have made, the work that has been covered in subjects so far and how each department are planning to assess year 11 throughout the year. In addition, the videos include how you can help support your son/daughter throughout this time.

Please use the following links to access the videos:

Exeter College have provided a video which is an introduction to the college including details about the courses they offer and provides information about the support that they give to both students and parents. The link for this video is below:

At this point in the term year 11 students have not yet sat any exam based assessments as we are focusing on consolidating content from the summer term and delivering new content. We are therefore not able to share any current assessment data with you. Our intention though is for in-class assessments to take place before October half term (the plans for which will be communicated to students via their class teachers) and for us to share the results from these interim assessments with you in a summary written report on November 9<sup>th</sup>. This report will include bespoke feedback on your son/daughter's areas of strength and their areas for development.

We are also planning to host a remotely delivered Revision Skills evening for parents/carers and year 11 students before the mock exam window which starts on the 23<sup>rd</sup> November. We will send out more details about this event and how to sign up in the next few weeks.

If you have any questions or require any more information, please do not hesitate to contact your son/daughter's tutor or the Head of Department of a subject. All email addresses are on our school website.

Yours sincerely

Mr Lindsay Coren,

Assistant Headteacher/Head of Maths
